Techknow's 46" or 55" OCS

An Analytics Driven Digital Merchandising Platform
### Preliminary

TEMS is a cloud based application that allows the marketing team to remotely manage all campaigns on the OCS. This includes running and analyzing effectiveness of promotions by daypart, displaying pictures of suggestive sell items thus increasing your average ticket. In addition TEMS pushes community messaging or consumer alerts to your OCS.

TOPS cloud based applications enable the restaurant to remotely monitor the operational status of each device thus improving help desk efficiency. Track and monitor vehicle detection box or loop issues. Be notified upon the loss of data or when wiring problems are identified.

TEMS & TOPS can be managed from any mobile device with internet access.

*Subscription required

Your Drive-Thru produces 70% of the Restaurant's revenue.
