

Techknow LOOP

W Industry's First
Wireless Timer

Wired vehicle loop detectors have consistently been recognized as one of the drive-thru industry's leading service related issues. In an effort to eliminate these issues, Techknow has created the industry's first wireless vehicle detector.

Benefits

- Battery life of five to ten years without maintenance
- Reduces costs by eliminating the need for expensive cable runs
- 900 Mhz Frequency Hopping Spread Spectrum technology combined with Time Division Multiple Access RF communications ensures data delivery in the unlicensed frequency band
- One controller can communicate with up to 100 vehicle detection devices enabling easy expansion
- Numerous applications such as curbside pickup, mobile pickup, measuring pull ups, parking lot control, total car counts
- Minimizes service related issues with wired loops
- No stranded investment in timer hardware
- Software migration path from competitive timers
- Connectivity to wired and wireless loops
- Add additional loops for less than \$330.00
